Comments: I am opposed the the entire Yucca Mtn Project, and I am opposed to building any railraod to Yucca Mtn.

1
Yucca Mtn has been built on pseudo nuclear science, just the like the nuclear testing 40 years ago. The truth is there is very little credible science behind Yucca Mtn. The real science is that Nevada is one to the most earthquake active areas in the country, and no science can predict the effects on Yucca Mtn from

large intensity earthquakes. Additionally there is no technology which can guarantee safe storage of radioactive materials longer than several centuries, a miniscule amount of the readioactive half life of materials to be stored there.

I am opposed to Yucca Mtn, I support any politician who opposes Yucca Mtn, I will work against any politician who supports Yucca Mtn, and I will participate in any legal demonstrations or actions against Yucca Mtn.

Further as a citizen of Nevada and a taxpayer, I do no wish to be exposed to the costs our State might incur if sued for falling home values in Las Vegas due to the dangers of Yucca Mtn.

Yucca Mtn is bad "science," Yucca Mtn is bad for Las Vegas, and Yucca Mtn is bad for Nevada. We don't need jobs that bad!]

Stop Yucca Mtn.
